One Page Narrative

This data was extracted from the Department's Public Safety Server and covers data beginning January 26, 2015. On January 26, 2015 the department began collecting data pursuant to General Order B-4 (issued December 31, 2014). Under that Order, officers were required to provide certain data after making any detention (vehicle, bicycle, pedestrian, suspicious auto). This dataset provides information about detentions, including the race, sex, age range, of the person detained; the reason for the stop; the type of enforcement taken (if any), and whether or not a search was conducted. Also provided are the date, time, location of the detention, as well as the incident number and call for service type.
